Resume Summary

Innovative Full Stack Mobile Developer with expertise in building scalable cross-platform applications using Flutter and Node.js. Proven track record of managing the full software development lifecycle (SDLC), from UI/UX implementation to deployment on App Store and Play Store. Adept at architecting complex solutions involving RESTful APIs, Firebase services, and real-time location tracking systems, with a passion for writing clean, maintainable code and delivering high-performance mobile experiences. **Key Skills:** - Cross-platform (iOS/Android) application development with Flutter - Application publishing processes on Google Play Store and Apple App Store - RESTful API integrations and data operations - Firebase (Authentication, Firestore, Cloud Functions, etc.) - Integration of location-based services (Google Maps location tracking, etc.) - Payment systems integration - Dart programming language and modern Flutter architectures (Bloc, Provider, GetX, etc.) - Version control systems (Git) - Development in accordance with UI/UX design principles - RESTful API development with Node.js - DevOps - SQL/PostgreSQL

Experience

Flutter Developer

İdeva Yazılım | August 2025 - Still Working

Flutter Developer

Cross4Solution | March 2024 - April 2025

Flutter Developer

Webomax It | June 2023 - February 2024

Education

Karabuk University

Computer Engineering | December 2018 - June 2025

Bachelor

Languages

English (Good)

Skills

JavaScript, Xcode, Android Application Development, ios Application Development, SQL, Web Programming, Postgresql, Dart, Backend, WebSocket, RESTful, Firebase, Node.js, next.js, Google Maps Api, Mobile Software, Flutter

Projects

LafLa – Founder & Full-Stack Developer

April 2026

<https://lafLa.online/>

LafLa is a real-time multiplayer word-guessing , game and voice chat platform. Players can compete in team-based Taboo matches, join voice chat rooms, add friends, send direct messages, and purchase avatars through an in-app shop. I single-handedly designed, developed, and deployed the entire technical stack from the ground up.

- Backend: Built a real-time, event-driven server using Node.js, TypeScript, and Fastify, featuring WebSocket-based game state synchronization, a state machine-driven game engine, JWT authentication, and a coin-based economy system. Integrated PostgreSQL for persistent data storage and CoTurn (STUN/TURN) for WebRTC signaling. Containerized the entire stack with Docker and docker-compose.
- Mobile App: Engineered a cross-platform mobile application for iOS and Android using Flutter, implementing Provider for state management, Dio for REST API communication, real-time updates via WebSocket, and peer-to-peer voice chat using flutter_webrtc with mesh networking and voice activity detection.
- Real-Time Infrastructure: Designed a full-duplex communication layer supporting 30+ WebSocket message types, P2P audio streaming via WebRTC, ref-counted connection lifecycle management, and in-app purchases for a virtual coin economy. çevir

KursAsistan

February 2026

<https://kursasistan.com/>

KursAsistan (SaaS) – Founder & Full-Stack Developer KursAsistan is my own SaaS startup providing a comprehensive management system for tutoring centers, digitalizing operations such as student attendance tracking and automated parent notifications. I single-handedly architected and developed the entire technical infrastructure from the ground up.

- Backend: Built a high-performance, scalable API infrastructure utilizing Node.js.
- Web (Admin Panel & Landing Page): Developed a dynamic admin dashboard and an SEO-optimized landing page using Next.js to ensure a seamless user experience.

- Mobile App: Engineered a robust, cross-platform mobile application for both iOS and Android platforms using Flutter.

ole (Coffee Loyalty App) | Flutter Developer

November 2025

<https://apps.apple.com/tr/app/ole-kahve-sadakat-kampanya/id6753960586?l=tr>

Developed a location-based customer loyalty application allowing users to discover nearby cafes and earn rewards.

- Geolocation & Mapping: Engineered a proximity algorithm to list the nearest partner cafes based on user location.
- QR Integration: Implemented a robust QR code scanning system for seamless point collection and reward redemption at checkout.
- Architecture: Built using MVVM architecture to ensure code scalability and testability, faithfully converting Figma designs into responsive Flutter UI.
- Tech Stack: Flutter, Dart, REST API, Google Maps API, QR Code Scanner.

Çektr (Roadside Assistance Platform) | Flutter Developer

April 2025

<https://play.google.com/store/apps/details?id=com.mobilecektr.app&pcampaignid=web>

Designed and deployed a dynamic marketplace application connecting users with tow truck services in real-time.

Live Tracking: Integrated live map tracking features, enabling users to monitor the service vehicle's location instantly after dispatch.

Marketplace Logic: Developed the client-side logic for a dynamic marketplace, handling service requests and secure payment flows.

Tech Stack: Flutter, Google Maps SDK, Payment Gateway Integration, WebSocket (for live tracking).

Egzersiz Saati

March 2024

<https://apps.apple.com/tr/app/egzersiz-saati/id6503187041?l=tr&platform=iphone>

Built a comprehensive health platform facilitating remote interaction between physiotherapists and patients.

Custom Programs: Enabled users to access personalized exercise routines created by expert physiotherapists.

Appointment System: Developed an integrated appointment management system for scheduling and tracking sessions.

Tech Stack: Flutter, Firebase (Auth/Firestore), Calendar Integration.
